

REMARKS

In 7/12/2005 office action, Examiner rejects under 35USC103a claims 20-21, 26, 28 and 31-34 over David et al. (US.PAT 5544649) in view of Wootton et al (US.PAT 5870471); claims 22-23, 25, 27 and 29-30 over David et al in view of Wootton further in view of Kennedy III et al (US.PAT 6301480); claims 24 and 35-37 in view of David et al in view of Wootton et al further in view of Ballantyne et al (US.PAT 5867821). Thus Applicants amend independent claims 20, 31 and 33 to specify "... such residential or medical surveillance being communicated via an electrical power-line coupling to a cellular telephone to report status." Thus as now claimed by Applicants, none of above cited references teaches or suggests integrated residential/medical surveillance whereby surveillance report is sent to a wireless/cellular telephone at least in part via electrical power-line, such as X10 (per Specification support, page 7, lines 22-26, and page 12, lines 8-28.) Applicants submit that claims are in allowance condition, and respectfully request rejections be reconsidered.

Respectfully submitted,

Dennis S. Fernandez
